How environmentalists are killing the planet, destroying the economy and stealing your children's future.

In Watermelons, an updated edition of his ground-breaking 2011 book, James tells the shocking true story of how a handful of political activists, green campaigners, voodoo scientists and psychopathic billionaires teamed up to invent a fake crisis called 'global warming'.

This updated edition includes two new chapters which, like a geo-engineered flood, pour cold water on some of the original's sunny optimism and provide new insights into the diabolical nature of the climate alarmists' sinister master plan.
